PROFILE

A dedicated and detail-oriented BCA graduate currently pursuing an MCA, with a strong interest in Data Science and Cybersecurity. Passionate about exploring innovative technologies to solve real-world problems. Proficient in foundational concepts of programming, networking, and operating systems, with a keen focus on ethical hacking and advanced analytics. Eager to contribute to challenging projects and acquire hands-on experience in the field.

SKILLS

Computer Network
Cryptography
MySQL
Python Libraries(Pandas,
Numpy, Matplotlib)
Web Development
Data science
Django Framework

PROJECTS

Volunteer Hiring System

2024

Developed a platform to connect students seeking part-time opportunities with event companies in need of volunteers. The system includes user authentication, a searchable database for job postings, and an intuitive interface for seamless communication between students and employers. Focused on creating a practical solution to bridge the gap between event organizers and aspiring volunteers.

EDUCATION

Gujarat University
2021-2024
Bachelor of Computer
Application

GLS University
2024-till now
Master Of Computer
Application

Library Management System

2024

Designed and implemented a Library Management System to streamline the process of managing books, borrowers, and transactions. The system features user authentication, book search functionality, and automated due date tracking. Focused on enhancing efficiency in library operations by reducing manual errors and improving accessibility for users and administrators.
