1. Student

Attribute	Data Type	Description		
id	ObjectId	Unique identifier for the student		
name	String	Full name of the student		
email	String (Unique)	Unique email address of the student		
password	String	Encrypted password for authentication		
joinedClasses Array of ObjectId List of class IDs the student has joined				

2. Teacher

Attribute	Data Type	Description		
id	ObjectId	Unique identifier for the teacher		
name	String	Full name of the teacher		
email	String (Unique)	Unique email address of the teacher		
password	String	Encrypted password for authentication		
createdClasses Array of ObjectId List of class IDs the teacher has created				

3. Admin

Attribute	Data Type	Description
id	ObjectId	Unique identifier for the admin
name	String	Full name of the admin
email	String (Unique)	Unique email address of the admin
password	String	Encrypted password for authentication

4. Classroom

Attribute	Data Type	Description
id	ObjectId	Unique identifier for the class
name	String	Name of the class
uniqueID	String (Unique)	Unique identifier for students to join the class

teacherID ObjectId Reference to the teacher who owns the class studentIDs Array of ObjectId List of student IDs who have joined the class sections Array of ObjectId List of sections within the class

5. Section

Attribute Data Type Description

id ObjectId Unique identifier for the section

title String Title of the section

resources Array of ObjectId List of resource IDs

assignments Array of ObjectId List of assignment IDs

quizzes Array of ObjectId List of quiz IDs

polls Array of ObjectId List of poll IDs

6. Resource

Attribute Data Type Description

id ObjectId Unique identifier for the resource

title String Title of the resource

file String (File Path) Path to the uploaded PDF file

7. Assignment

Attribute Data Type Description

id ObjectId Unique identifier for the assignment

title String Title of the assignment

questionFile String (File Path) Path to the uploaded PDF with questions

submissions Array of ObjectId List of student submission IDs

8. Submission

Attribute Data Type Description

id ObjectId Unique identifier for the submission

studentID ObjectId Reference to the student who submitted

answerFile String (File Path) Path to the submitted PDF file

submittedAt DateTime Date and time of submission

9. Quiz

Attribute Data Type Description

id ObjectId Unique identifier for the quiz

title String Title of the quiz

questions Array of ObjectId List of quiz question IDs

attempts Array of ObjectId List of student quiz attempts

10. Question

Attribute Data Type Description

id ObjectId Unique identifier for the question

text String The question text

options Array of String List of multiple-choice options

correctAnswer String Correct answer to the question

11. QuizAttempt

Attribute Data Type Description

id ObjectId Unique identifier for the guiz attempt

studentID ObjectId Reference to the student who attempted the quiz

answers Array of String List of selected answers

score Integer Final score of the attempt

12. Poll

Attribute Data Type Description

id ObjectId Unique identifier for the poll

title String Title of the poll

options Array of String List of possible answers responses Array of ObjectId List of student response IDs

13. Response

Attribute Data Type Description

id ObjectId Unique identifier for the response

studentID ObjectId Reference to the student who responded

selectedOption String The chosen option by the student

Relationships

1. Students, Teachers, and Admins are stored in separate tables.

- 2. Students can join multiple Classes (Many-to-Many).
- 3. Teachers can create multiple Classes (One-to-Many).
- 4. Classes contain multiple Sections (One-to-Many).
- 5. Sections include Resources, Assignments, Quizzes, and Polls (One-to-Many).
- 6. Assignments collect multiple Submissions (One-to-Many).
- 7. Quizzes consist of multiple Questions and Attempts (One-to-Many).
- 8. **Polls** collect multiple **Responses** (One-to-Many).
